SUMMARY

Frontend Developer with **2.5+ years** at HomeLane, owning the frontend of **Supernova**, **HomeLane Vastu** and homelane.com's **Strapi-powered pages** in React.js, Next.js and Redux. Raised homelane.com's **Lighthouse score from 50 to 80+**, saved **₹75 lakh in ad spend** through lead-form improvements, and set up **WebEngage and Clarity analytics** across products. Ships fast with AI-assisted development and runs **two live side products**.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), HTML5, CSS3, React.js, Next.js, Redux
Styling: Tailwind CSS, Sass, Bootstrap, Responsive Design
CMS & Integrations: Strapi (Headless CMS), REST APIs, OTP Authentication, Payment Gateway Integration
Analytics: WebEngage, Microsoft Clarity, Event Tracking, First-Touch Traffic Source Tracking
AI: AI-Assisted Development with Claude, Rapid Prototyping
Performance & Tools: Lighthouse, Core Web Vitals, Lazy Loading, Code Splitting, Git, GitHub
Backend (basics): Node.js, Express.js, MongoDB, Redis
Certifications: React.js, Responsive Web Design (HTML, CSS, JavaScript)

WORK EXPERIENCE

HomeLane **Feb 2024 – Present**
Frontend Developer (Full-time from Apr 2024; Intern Feb – Apr 2024) *Interior Design & Home Solutions*

- **Supernova:** Built and own the entire frontend of a guided interior-requirements platform that turns client answers into a personalised design summary; it drives a **steady flow of qualified leads and design appointments**.
- **HomeLane Vastu:** Built and own the entire frontend of an **AI-powered Vastu tool**: users upload a floor plan, AI scans it and the app returns a personalised Vastu plan.
- Delivered both end to end: **Redux** state, multi-step lead forms, **OTP verification**, REST APIs, and **WebEngage and Microsoft Clarity event tracking** across the full form funnel.
- Replaced the pincode field in website lead forms with a **city dropdown**, cutting form drop-offs and lifting lead volume, saving the company **₹75 lakh in ad spend**.
- Raised homelane.com's **Lighthouse score from 50 to 80+** via **image optimization** (WebP, compression, lazy loading), **code splitting**, deferred JS/CSS and third-party scripts, and font, caching and **CLS** fixes.
- Migrated **30+ hand-updated Unbounce paid landing pages** into **one dynamic Strapi template**, and connected **10+ page types** (organic city, paid city, category) to **Strapi CMS** for code-free marketing edits.
- **MakeMyBath:** Built the UI and frontend integrations for a group brand that closed **₹1 Cr+ in a single quarter**; integrated the full **payment flow in 30 minutes** using AI-assisted development.
- Added **first-touch traffic source tracking** to Supernova, Vastu and MakeMyBath for lead attribution.
- Built **8+ pages on homelane.com**, including Reviews, Interior Design, Bedroom Design, Bathroom Design, Offerings, Decko, Partner and Cities, plus multiple lead forms.
- Fixed production form bugs (e.g. users unable to complete OTP) **within 1 day** to keep leads flowing.

PERSONAL PROJECTS

TextToHand AI | *AI-Assisted Development (Claude)* texttohandai.com

- Built and launched a **text-to-handwriting web app in one day** using Claude, from idea to live product.
- Grew to **50+ daily users** purely through organic search, with **zero ad spend**.

AgeCalcNow | *Free Age Calculator Web App* agecalcnow.com

- Built a free age calculator that turns a date of birth into **exact years, months and days**, **live-ticking seconds**, **next-birthday countdowns** and life milestones.
- Added **shareable results** so users can send their age details to friends and family.

EDUCATION

Tula's Institute **2020 – 2024**
B.Tech, Computer Science and Engineering – CGPA: 7.0 *Dehradun, India*

St. Andrews Public School **2020**
Class XII (Intermediate) – 70% *Agra, India*
